

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

Valvoline White Synthetic ChainLube

Latest chain lubrication technology
Optimum Anti-Wear protection
Excellent Anti-Fling character
Maximum Chain & Sprocket life
Good adhesive properties
O-ring safe

LUBRICATES AND PROTECTS CHAINS

Valvoline White Synthetic ChainLube offers the latest development in chain lubrication technology. Provides optimum anti-wear protection with a greasefilm which resists adherence of abrasive dirt and debris. The synthetic components in the product create a long lasting lubricating and protecting film on the sprockets to ensure maximum chain and sprocket life. The product has good adhesive properties and with that an excellent anti-fling character. Valvoline White Synthetic ChainLube penetrates easily into either o-ring or x-ring designed chains. The product is O-ring safe.

EASY TO USE

Valvoline White Synthetic ChainLube is easy to use on motorcycle chains, either on- or off the road, garden equipment, agriculture, and industrial use. The product should be sprayed on the sprocket contact side while rotating the chain slowly to maximize the penetration. After 10-15 minutes drying, the product has developed its maximum protective character. It leaves a white film which makes the application process easier and provides an easy check if all places to be lubricated are covered.

TECHNICAL DATA

Aerosol spraycan	300 ml.
Appearance	Liquid, clear to white.
Specific Gravity	0.72 g/cm ³
Flash Point PMCC	-18°C.

COMMENT

Valvoline White Synthetic ChainLube is extremely flammable.
Use only in well ventilated areas. Keep out of the reach of children.
Do not smoke, and do not spray on hot objects.
